### Sprint 2 Marking Criteria

As with Sprint 1, clients are asked to bear in mind that maximum marks for a criterion, eg 5/5, should only be awarded sparingly. As before, the marks for group-based part of Sprint 2 will be the sum of the individual criteria. The marking criteria of the components of Sprint 2 are:

- Extent to which the goals for Sprint 2 were met (/10).
  - 0 Nothing to show
  - 1-3 About 25% of the goals have been completed, or more, but less well
  - 4-6 About 50% of the goals have been completed, or more, but less well
  - 7-9 About 75% of the goals have been completed, or more, but less well
  - 10 Everything done, and completed to an exceptional standard
- Quality of the retrospective (from the client's perspective) (/5)

This is not about whether the goals of Sprint 1 were met, but the quality of the Teams assessment about process of meeting those goals. What went well? What did not go so well? What can be improved?

  - 0 Nothing to show
  - 1 A rudimentary or very abbreviated discussion
  - 2 A reasonable discussion, but with significant omissions or other issues
  - 3 A reasonable discussion with some insights
  - 4 A superior discussion with evidence of solid understanding of the what has occurred and the processes going forward
  - 5 Utterly outstanding
- Coherence and reasonableness of the set of next set of goals (stories) (/5)
  - 0 No plan
  - 1 Incoherent set of goals that bear little relationship to desired final outcomes
  - 2 Sprint 3 goals bear some relationship to final outcome
    - Sprint 3 goals clearly heading to final outcome, but are either too close
  - 3 (essentially just final goal recapitulated) or too unambitious, leaving far too much for the final Sprint
  - 4 A solid set of goals, with appropriate phasing, but something missing
  - 5 An extremely solid plan
